

100 Hut Walks in the Alps

Sept 2014

Readers planning to visit the Monte Rosa Hut above Zermatt, described as Walk 28 in *100 Hut Walks in the Alps*, are warned that as a result of climate change the route as described is no longer valid. Descent onto the Gorner glacier is now by way of near-vertical ladders, and the hike over the glacier crosses numerous widening crevasses. Unless experienced and adequately equipped for glacier travel the Zermatt website (www.zermatt.ch) recommends all potential walkers on this route to hire a mountain guide.

May 2014

Since this guide went to print, certain website changes have come to our attention. (They have been corrected in the digital formats.)

They are as follows:
